## > Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding the expected impact of delayed sales of finished goods inventory on net income, adjusted net income, free cash flow and adjusted EBITDA, interest expense, mining rates, costs, returns, mine plans, mine lives, capital expenditures, development efforts at Palmarejo and Kensington, operations at Wharf, expansion at Rochester, process plant enhancements, cash flow, recoveries, processing costs, resource conversion and expansion, exploration efforts, building a pipeline of high-quality projects, drill results and other expectations regarding the Palmarejo complex, the La Preciosa project, and ore purchases at San Bartolomé. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause Coeur's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), changes in the market prices of gold and silver and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions, grade variability, any future labor disputes or work stoppages, the uncertainties inherent in the estimation of gold and silver ore reserves, changes that could result from Coeur's future acquisition of new mining properties or businesses, reliance on third parties to operate certain mines where Coeur owns silver production and reserves and the absence of control over mining operations in which Coeur or its subsidiaries hold royalty or streaming interests and risks related to these mining operations including results of mining and exploration activities, environmental, economic and political risks of the jurisdiction in which the mining operations are located, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Form 10-K and Form 10-Q. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Christopher Pascoe, Coeur's Director, Technical Services and a qualified person under Canadian National Instrument 43-101, reviewed and approved the scientific and technical information concerning Coeur's mineral projects in this presentation. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should see the Technical Reports for each of Coeur's properties as filed on SEDAR at [www.sedar.com](http://www.sedar.com).

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at <http://www.sec.gov>.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, including adjusted net income (loss), adjusted EBITDA, total debt to LTM adjusted EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted net income (loss), adjusted EBITDA, total debt to LTM adjusted EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs are important measures in assessing the Company's overall financial performance.

Gold and silver equivalence assumes silver-to-gold ratio of 60:1 unless otherwise noted. Average spot prices and average silver-to-gold ratio for fiscal years 2013, 2014, 2015, and 2016 provided in the appendix to this presentation.

## > Highlights from 2016

- Record production of 10.0 million silver equivalent ounces (AgEqOz)<sup>1</sup> in 4Q 2016 and 36.3 million AgEqOz<sup>1</sup> for the full year (FY)
- Continued cost improvements companywide
- Positive FY net income and adj. net income<sup>1</sup> for the first time since 2012
- FY cash flow from operating activities of \$125.8 million, an 11% year-over-year increase
- FY adjusted EBITDA<sup>1</sup> increased nearly \$90 million, or 68%, to \$215.2 million
- 2016 debt reductions totaled \$280 million, lowering annual cash interest expense by an anticipated \$25 million
- Total debt to last twelve months (LTM) adjusted EBITDA<sup>1</sup> now at 1.0x, down from 3.8x a year ago and 5.5x fifteen months ago
- Non-core asset sales totaled \$23.8 million in 2016; additional \$25.0 million received in 1Q 2017

(1) See non-GAAP reconciliation tables in the appendix to this presentation. For purposes of silver equivalence, a 60:1 ratio is assumed unless otherwise noted.

## > Year-End Results Reconciliation

- Full-year 2016 revenues of \$665.8 million were approximately \$30 million lower than the median consensus estimate of \$696 million due to:
  - A port-related delay of a \$5.6 million Kensington shipment
  - Gold retained for sale to Franco-Nevada (FNV) in mid-January, representing revenues of \$6.1 million
  - A \$7.0 million Palmarejo doré shipment which was in transit and not yet available for sale
  - A mid-December Palmarejo shipment valued at \$7.9 million that was sold in January
- The estimated EBITDA<sup>1</sup> impact of this inventory is \$9.6 million and would have resulted in full-year 2016 adjusted EBITDA<sup>1</sup> of \$224.8 million if these sales occurred in December
- The estimated net income associated with this finished goods inventory is approximately \$2.2 million and would have resulted in full-year 2016 adjusted net income of \$49.9 million
- Estimated incremental positive free cash flow<sup>1</sup> related to these delayed sales and two other one-time items in 4Q was \$32.8 million and would have resulted in full-year 2016 free cash flow<sup>1</sup> of \$30.5 million

Note: For additional detail, please see following pages.

(1) EBITDA and adjusted EBITDA are non-GAAP financial measures. Free Cash Flow calculated as Cash Provided by Operating Activities less Capital Expenditures and Gold Production Royalty Payments.

## > Near- and Long-Term Growth Initiatives

- Wharf Resources (February 2015)
  - Acquired from Goldcorp for \$99 million
  - Significant U.S. NOL tax synergies
  - Improved plant recovery rates roughly 20% since acquisition
  - Increased production and decreased costs in 2015 and 2016
  - Generated \$86 million of free cash flow<sup>1</sup> through the end of 2016
  - Increased gold reserves by over 27%<sup>2</sup> within the first year following acquisition
- Paramount Gold and Silver (April 2015)
  - Primary acquired asset was a deposit adjacent to the Palmarejo mine
  - Unlocked significant capex and cost synergies
  - Substantial capex savings due to existing Palmarejo infrastructure and plant
  - Free from any non-government third party royalties or streams
  - Significant exploration potential

(1) Free Cash Flow calculated as Cash Provided by Operating Activities less Capital Expenditures and Gold Production Royalty Payments. See non-GAAP reconciliation tables in the appendix to this presentation.

(2) Based on 560,000 ounces of gold reserves reported by Goldcorp in its Annual Information Form dated March 31, 2014 ("AIF") for the financial year ended December 31, 2013 and 712,000 ounces of gold reserves as of December 31, 2015 as reported by Coeur. See reserve and resource tables in the appendix of this presentation.

## > New Palmarejo Agreement Driving FCF Growth<sup>1</sup>

- New, more favorable gold stream agreement with Franco-Nevada Barbados took effect in August 2016
  - Applies to 50% of gold production from legacy Palmarejo land package
  - Franco-Nevada to pay \$800 per ounce vs. \$416 per ounce under the old royalty agreement
  - No annual minimum delivery amounts and no requirement to prioritize ounces subject to the stream over ounces not subject to the stream
  - Coeur paid \$2 million to terminate the prior royalty stream agreement in 2014
  - Franco-Nevada paid \$22 million to Coeur Mexico in 2015 to help fund development of Guadalupe
- Material from the Independencia Este deposit, where mining is currently ramping up, is not subject to the gold stream

(1) Free Cash Flow calculated as Cash Provided by Operating Activities less Capital Expenditures and Gold Production Royalty Payments. See non-GAAP reconciliation tables in the appendix to this presentation.

## > Organic Growth Remains a Priority

### Capex by Mine Site

### Capex Composition

2017 capital expenditures expected to total \$115 - \$135 million<sup>1</sup>

- ~\$10 million of carryover from 2016
- \$11 - \$13 million of capitalized exploration
- **Palmarejo:** \$40 - \$45 million
  - Ongoing transition to UG operations at Guadalupe and Independencia
  - Includes capitalized exploration of ~\$5 million
- **Rochester:** \$30 - \$35 million
  - Completion of stage IV leach pad expansion
- **Kensington:** \$40+ million
  - Continued development of Jualin
  - Includes capitalized exploration of ~\$3 million

(1) Guidance as published by Coeur on February 8, 2017.

(2) Sustaining capex excludes capital leases.

## > Silver Equivalent<sup>1</sup> Reserves Increase 9% YOY

*2016 gold and silver reserves increased 4% and 13%, respectively, driven by resource conversion at Rochester*

### Gold P&P Reserves

(K oz)

### Silver P&P Reserves

(K oz)

(1) For purposes of silver equivalence, a 60:1 silver-to-gold ratio was used.

(2) See slides in Appendix for additional information related to mineral reserves and resources. Canadian investors should refer to the applicable technical report for Coeur's properties on file at [www.sedar.com](http://www.sedar.com).

## > Expanded Exploration Program

### 2016 Program

- Totaled \$25.8M (\$12.9M expensed; \$12.9M capitalized)
- **Palmarejo** exploration totaled \$11.2M (\$5.1M expensed; \$6.1M capitalized)
  - Focused on Guadalupe, Independencia, Los Bancos, and Nación-Dana
  - Eight drill rigs active at year-end
- **Kensington** exploration totaled \$6.2M (\$3.5M expensed; \$2.7M capitalized)
  - Focused on Kensington Main, Jualin, Raven and testing new veins in the district
- **Rochester** exploration totaled \$3.5M (\$0.8M expensed; \$2.7M capitalized)
  - Continued extension and infill of East Rochester discovery
  - Resource conversion drilling of in-pit inferred resources led to significant reserves increase

### 2017 Program Focus

- Targeting \$34M - \$38M (\$23M - \$25M expensed; \$11M - \$13M capitalized)
- **Palmarejo** (~\$7M expensed; ~\$7M capitalized)
  - Resource conversion at Guadalupe and Independencia
  - Resource expansion at Independencia at depth, north and south
  - Resource expansion at Nación-Dana and new drill testing at La Bavisia, Norte Guadalupe, and Sur de Colorado
- **Kensington** (~\$4M expensed; ~\$3M capitalized)
  - Resource expansion and conversion at Kensington Main, Jualin, and Raven
- **Rochester** (~\$1M expensed; ~\$1M capitalized)
  - Resource expansion at East Rochester
  - Resource conversion at South Pit
- **La Preciosa** (~\$4M expensed)
  - Definition drilling of new geologic model

## > Significant Debt Reduction Over Past 15 Months

## > Non-Core Asset Divestitures

In 2016, Coeur opportunistically divested assets for total consideration of \$23.8 million

- Strengthen balance sheet
- Non-core assets
- Attractive relative valuation environment for streams and royalties
- Allocate proceeds to higher rate of return opportunities

These efforts have continued in early 2017

Closing Date	Asset	Purchaser	Consideration	
March 31, 2016	Cerro Bayo 2.0% NSR royalty	Mandalay Resources Corporation	\$5.7M	\$4.0M cash; 2.5M shares
April 19, 2016	La Cigarra 2.5% NSR royalty	Kootenay Silver Inc.	\$3.6M	\$500,000 cash; 9.6M shares
April 19, 2016	El Gallo NSR royalty (3.5% until 350k cumulative AuEq production reached; 1.0% thereafter)	Subsidiary of McEwen Mining Inc.	\$6.3M	\$5.3M cash, plus \$1.0M contingent payable mid-2018
May 4, 2016	Martha assets in Argentina	Hunt Mining Corp	\$3.0M	\$1.5M at closing, \$1.5M on 1-year anniversary
July 25, 2016	Correnso 2.5% NSR royalty	Subsidiary of OceanaGold Corporation	\$5.2M	\$4.5M at closing, plus \$0.7M contingent payable in 2017
February 10, 2017	Joaquin Project in Argentina	Pan American Silver	\$25.0M <sup>1</sup>	\$15.0M cash, \$10.0M shares of Pan American stock
<b>Total Consideration</b>			<b>\$48.8M</b>	

(1) Excludes a 2% NSR royalty on the Joaquin Project retained by Coeur.

## > Looking Ahead

---

- Continued ramp-up of Independencia throughout 2017, targeting combined mining rate of 4,500 tpd at Palmarejo
- Construction of Rochester's Stage IV leach pad expansion expected to be complete in mid-2017
- Initial production at Jualin anticipated in late 2017
- Update on potential alternative development and operating plan for La Preciosa
- Expanded exploration program targeting near-mine resource growth and building a longer-term pipeline of high-quality projects

## 2017 Production Outlook

### Production and Cost Performance<sup>1</sup>

### Highlights

- Development of Guadalupe and Independencia continues with combined mining rates expected to increase to 4,500 tpd by year-end 2017
- Silver and gold production expected to increase over 50% from 2016 to 2017
- Strong exploration focus on resource conversion and expansion
- First gold sale to Franco-Nevada under new, more favorable stream agreement took place in 4Q 2016

(3) Excludes gold production royalty payments to Franco-Nevada.

## Previous Royalty Agreement

## New Stream Agreement

### Income Statement

- 100% of gold sales recorded at spot prices
- Fair value adjustments recorded to reflect changing gold prices on minimum ounce requirement

- Gold sales to FNV recorded at \$800 per ounce plus deferred revenue

### Cash Flow Statement

- 100% of gold sales included in cash flow from operating activities at spot prices
- Gold production royalty payments recorded as cash used in financing activities

- Gold sold to FNV included in cash flow from operating activities at \$800 per ounce, with deferred revenue component eliminated as non-cash

### Balance Sheet

- Minimum ounce requirement recorded as a royalty liability

- \$22 million deposit by FNV recorded as deferred revenue to be recognized in revenue over life of the mine

## Production and Cost Performance<sup>1</sup>

## Highlights

- Tons placed in 2016 increased 19% year-over-year to 19.6 million tons, the highest level since Rochester first began operating in 1986
- Commenced construction on Stage IV leach pad expansion in July 2016; construction remains on-schedule and on-budget, with completion expected in 3Q 2017
- Year-end 2016 silver and gold reserves increased over 40% and nearly 70%, respectively, extending Rochester's mine life by several years<sup>3</sup>

## Production and Cost Performance<sup>1</sup>

## Highlights

- 2016 production remained near record levels at 124,331 ounces
- Development of high-grade Jualin deposit was over 64% complete as of 2016 year-end and is expected to be the main driver of capital expenditures at Kensington in 2017
- Exploration efforts targeting resource expansion and conversion at Kensington Main, Jualin, and Raven

## Production and Cost Performance<sup>1</sup>

## Highlights

- Acquired in 2015 for \$99 million from Goldcorp
- Coeur's lowest cost operation and largest source of FCF<sup>4</sup>, generating over \$86M since acquisition through 2016
- Improved plant recovery rates nearly 20% since the acquisition
- 2017 production expected to decrease due to anticipated completion of mining at the higher-grade Golden Reward deposit in mid-2017
- 2017 CAS/AuEqOz<sup>2</sup> expected to increase as a result of lower production, higher tons mined compared to 2016, and one-time plant maintenance expenses

(3) 2013 and 2014 costs represent total cash cost per ounce as in Goldcorp, Inc. filings. 2015 production includes production prior to Coeur's acquisition as reported by Goldcorp. 2015 costs are based on performance post-acquisition.

(4) Free cash flow calculated as cash provided by operating activities less capital expenditures and gold production royalty payments.

## Production and Cost Performance<sup>1</sup>

## Highlights

- Straightforward operation due to free-digging surface mining techniques (no drilling or blasting)
- Sourcing higher-grade, lower-cost ore from local sources with the goal of increasing overall grade, reducing costs, and boosting cash flow
- Processing enhancements have improved recoveries over the past several years
- Recent production decrease driven by water shortages resulting from ongoing nationwide drought conditions

Notes to 2016 mineral reserves and resources:

1. Effective December 31, 2016, except Endeavor, effective June 30, 2016.
2. Assumed metal prices for Mineral Reserves were \$17.50 per ounce of silver and \$1,250 per ounce of gold, except Endeavor at \$1,800 per metric ton of lead, \$2,200 per metric ton of zinc, and \$20.00 per ounce of silver.
3. Assumed metal prices for estimated Mineral Resources were \$19.00 per ounce of silver and \$1,275 per ounce of gold, except Endeavor at \$1,800 per metric ton of lead, \$2,200 per metric ton of zinc and \$20.00 per ounce of silver.
4. Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized. The preliminary economic assessment for the re-scoped mine plan at Kensington is preliminary in nature and includes Inferred Mineral Resources, and does not have as high a level of certainty as a plan that was based solely on proven and probable reserves and there is no certainty that the results from the preliminary economic assessment will be realized.
5. Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.
6. For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at [www.sedar.com](http://www.sedar.com).

Notes to 2015 mineral reserves and resources:

1. Effective December 31, 2015 except Endeavor, effective June 30, 2015.
2. Assumed metal prices for estimated reserves were \$17.50 per ounce silver and \$1,250 per ounce gold, except for San Bartolomé, Rosario and lower 76 underground deposits at Palmarejo at \$15.50 per ounce of silver and \$1,150 per ounce of gold, Endeavor at \$2,400 per tonne zinc, \$2,200 per tonne lead and \$17.00 per ounce of silver, and Wharf at \$1,275 per ounce of gold. Proven and probable reserves (other than Endeavor) were also evaluated using \$15.50 per ounce of silver and \$1,150 per ounce of gold. It was determined that substantially all proven and probable reserves could be economically and legally extracted or produced at these lower price assumptions.
3. Assumed metal prices for resources were \$19.00 per ounce silver and \$1,275 per ounce gold, except (a) Endeavor at \$2,400 per tonne zinc, \$2,200 per tonne lead, and \$17.00 per ounce silver, and (b) Wharf at \$1,350 per ounce gold.
4. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized.
5. Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.

#### Notes to the above mineral reserves and resources:

1. Mineral Reserves and Mineral Resources estimate as reported by Goldcorp in its Annual Information Form dated March 31, 2014 ("AIF") for the financial year ended December 31, 2013, available to Canadian investors at [www.sedar.com](http://www.sedar.com) under Goldcorp's profile. As discussed in the AIF, Mineral Reserves and Mineral Resources were prepared by Goldcorp in accordance with NI 43-101 under the supervision of a qualified person. Coeur is not treating these historical estimates as current and has not completed sufficient work to classify the historical estimate as current mineral reserves or mineral resources for Coeur's purposes. Coeur's qualified person will review and verify the scientific and technical information of Goldcorp, as well as complete the other work necessary for purposes of preparing a 43-101 technical report, including validation of data quality, resource model accuracy, and costs used in reserve and resource cutoffs.
2. As discussed in the AIF, mineral reserves were calculated by Goldcorp using metal prices of \$1,300 per gold ounce and \$22 per silver ounce, and mineral resources were calculated using \$1,500 per gold ounce and \$24 per silver ounce. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Rounding of tons, as required by reporting guidelines, may result in apparent differences between tons and grade.
